Creating Sensory Spaces

The Architecture of the Invisible

Barbara Erwine, University of Washington, USA

Creating Sensory Spaces celebrates spaces enlivened with sensual richness and provides you with the knowledge and tools necessary to create them. Drawing on numerous built case studies and environments in ten countries, and illustrated with over 85 full color images, the book presents a new framework for the design of sensory spaces including light, color, temperature, smell, sound, touch, and the personal and communal spaces created by habitual use patterns. The concepts of location, boundary, intensity, and duration, will inform your buildings and neighborhoods so that you're designing spaces that speak to the soul.
